

WISE INVESTMENT LIMITED - INCOME

Pershing

MONTHLY FACTSHEET

all data as at 31st July 2024

PORTFOLIO OBJECTIVES AND STRATEGY

The Wise Income Model Portfolio is designed for clients who are looking for a level of income plus capital growth in line with the MSCI PIMFA Growth index over a 5 to 10-year period. We aim to achieve this by investing in a select and focussed list of funds (unit trusts, investment trusts and OEICs), with diversification across geography, asset class and investment style. These funds invest in real assets, such as company shares (listed both in the UK and overseas), property, fixed interest and cash. The Portfolio aims to provide income of 3.5% or more per year. The Portfolio invests 60-100% in 'medium' risk assets, such as shares and property and can include up to 20% in 'high' risk assets such as shares in specific countries and industries. The Portfolio can also invest up to 40% in 'lower' or 'minimal' risk assets such as higher quality company debt and cash. We therefore consider the portfolio to be suitable for those willing to adopt a medium risk profile.

PORTFOLIO MANAGEMENT

WILLIAM GEFFEN

Head of Investment
Management

William joined Wise Investment in November 2023 and has 4 years' experience in managing equity funds. His main responsibility is the selection of suitable investments for portfolios and ensuring our investment service meets your requirements.

William successfully passed all three level of the Chartered Financial Analyst (CFA) exams gaining the qualification in 2021.

PERFORMANCE SINCE LAUNCH (using month-end data)

Key Portfolio Details

Launch Date	9th April 2014
Holdings	11

All data used on this factsheet is supplied by Financial Express. Rounding may result in charts and tables not adding up to 100% in displayed data. Performance is based on total returns on a bid-to-bid basis, net of UK dividend tax credits and is calculated referencing a model portfolio. Actual portfolio statistics may differ because of investment performance, cash movements, transaction costs and the timing of sales and purchases within the portfolio. Quoted performance does not include fees levied by Wise Investments Ltd or any fees from custodial services. Service fees will apply. Past performance is not a reliable indicator of future results. This document should not be construed as an investment recommendation.

1 The Historic Yield is the weighted average yield of the model based on the model's current constituents

2 Volatility is the annualised monthly volatility of the model portfolio to the most recent month end over a 3 year period or since launch if this period is less than 3 years

3 The Model OCF calculates the annual charges levied by the underlying fund holdings according to the model portfolio weights

4 The Service Fee incorporates the model OCF, the standard non-tiered annual fees levied by Wise Investments Limited and custodian fees, of which this is the highest possible fee. Further details of these charges are disclosed to clients investing in the model portfolios.

MONTHLY COMMENTARY

July was a mixed month for investors, with some signs of emerging volatility towards the end of the period perhaps signalling a change in sentiment at the end of a substantial “bull run” for equities stretching back into 2023.

In sterling terms, Global equities were fairly flat in the end, returning just 0.2% with the world’s largest market, the USA returning -0.4%, mostly due to a 1.5% drop in the dollar. Emerging markets and Asia ex-Japan also had poor months returning -1.3% and -1.7% respectively.

Europe fared better, being fairly flat at a -0.06% return; again pulled down by a 0.6% weakening of the currency. Japan also saw a currency driven return in the opposite direction with the Japanese market up 4.1% in sterling terms off the back of a substantial 5% strengthening of the Yen vs GBP.

The equity UK market was a marked outperformer this month, returning 3.2% as the market is now able to put any election uncertainty behind it, reassured by promises of a “pro-growth” labour government combined with much-hoped-for BOE rate cuts to boost the domestic economy.

In fixed income, yields dropped on anticipation of upcoming rate cuts due to steadily declining inflation and a cooling in the US jobs market. These lower rates boosted the bond, pushing UK Gilts (government bonds) up 2%, UK corporate bonds up 1.7% and inflation linked bonds up 2.1%. High yield bonds also returned 1.3%.

The property sector had a long overdue bounce likely helped by lower yields (and therefore reduced borrowing costs) with direct property up only 0.6% and listed property up a solid 2.6%.

Looking forward, we remain cautious on global equities, especially given recent volatility particularly in the US and Japanese markets and preferring the valuations and back drop of other markets such the UK equity market and good-quality fixed income.

The Income model returned 1.7%, ahead of the 1.0% return for the benchmark (PIMFA Growth). In equity markets, the constraint of the model needing to produce significant yield pushes it towards more mature sectors and businesses, with either more defensive or cyclical exposure (rather than growth). This in turn means that the model tends to outperform when those sectors do well – as they did this month. Notable strong underlying fund performances include the JOHCM UK equity income fund, up 5.6%, and the small position in the CT property fund up just over 4%. On the other hand performance was blunted by the Fundsmith equity fund dropping over 3% and the small position in Artemis SmartGARP Global Emerging Markets fund returning -4.2%.

In terms of positioning, we continue favour a strategy of strong core global equity exposure moderated by higher quality and shorter dated bonds in the fixed income portion of the portfolio.

However, in terms of tactical positioning, we have a solid 15% position in the JOHCM UK equity income fund to capture the substantial discount we see in the traditional “deep value” parts of the UK market, and a 5% into a position in the Teviot UK smaller companies fund to take advantage of the attractive valuations and dynamics of that part of the domestic market – an area where other larger institutional investors are unable to access due to liquidity constraints.

We also have small 5% exposure to emerging markets through the impressive Artemis SmartGARP Global Emerging Markets fund to capture the extreme discount emerging markets currently trade at compared to developed market equities.

Additionally, we retain positions in the CT property fund and BNY Mellon Infrastructure income funds, as we continue to see value in these down beaten asset class as shown by the large net asset value discounts in listed real estate trusts and infrastructure companies.

The income model remains a bit behind its benchmark on a 1yr and 3 yr basis, returning 12.6% and 18.0% respectively (vs 14.5% and 21.5% for the benchmark) however it is worth noting that this return has been achieved with significantly lower volatility than the benchmark, protecting investors from excessive price movements and maintaining their income-earning power.

HOLDINGS

Name	Weight	OCF
TwentyFour Absolute Return Credit	19.5%	0.36%
JOHCM UK Equity Income	15.0%	0.69%
VT Teviot UK Smaller Companies	5.0%	0.90%
BNY Mellon Global Income	10.0%	0.82%
BNY Mellon Global Infrastructure Income	10.0%	0.53%

CT Property Growth & Income	5.0%	1.03%
Artemis Global Emerging Markets	5.0%	0.92%
Cash	0.5%	0.00%

ASSET RISK

For Asset Risk Category definitions see the Wise Investment Risk Appendix, supplied to investors in the model portfolios.

ASSET ALLOCATION

IMPORTANT INFORMATION

Portfolio returns from the Wise Investment Model Portfolio Service will be subject to investment market fluctuations and there is no guarantee that the portfolio objectives, including any income targets, will be achieved. Where income is received as dividends, these will be automatically reinvested in the Model Portfolio, which may result in the Model Portfolio returns being higher than what a client portfolio can actually achieve. The performance will be reduced by the withdrawal of income and the impact of the ongoing charges and portfolio transaction costs. The charges can vary. Prices of funds and the income from them may fall as well as rise and investors may not get back the amount originally invested. Consequently, an investment into this portfolio should be considered for a 5 to 10 year period. The funds may invest in higher-yielding or non-investment grade bonds. The funds may hold investments denominated in currencies other than sterling. Changes in exchange rates will cause the value of these investments and the income from them to rise or fall. The funds can use derivatives for investment purposes. These instruments can be more volatile than investment in equities or bonds. Every effort is taken to ensure the accuracy of the data used in this document, but no warranties are given. Wise Investment has expressed its own views and these may change. The data contained in this document has been sourced by Wise Investment and should be independently verified before further publication or use.
